(+58)-414- 8524974 • stx_jose@hotmail.com • [LinkedIn](#) • [Github](#) • [Portfolio](#)

Experienced Frontend developer with over 2 year of experience building user-friendly, responsive and high-performance web applications. Skilled with the most popular frameworks in javascript React-NextJs. My objective is to obtain a position in a company that will allow me to develop my skills and contribute to the team's success..

SKILLS

HTML, CSS, Tailwind CSS, JavaScript, Node.js, Express, React., NextJs, Redux, Sequelize, PostgreSQL, Firebase, AWS,

SOFT SKILLS

Team work, Communication, problem solving, continuous learning

Certifications

Google Activate HTML/CSS

Full stack developer

EXPERIENCE

Servicios Especiales de Seguridad C.A (Fulltime)

I was in charge of managing and maintaining the company's website, among my tasks were correcting bugs, keeping it updated and working, add a database to keep records on taxes, bills, users registration, among others.

React Developer

Jun 2022 - Nov 2022

soyHenry - (Remote-Bootcamp)

Participated in a full-time immersive, 4-month software engineering, completing in-class projects, hackathons, and personal projects focused on real-world applications of full stack developer principles and best practices.

- [Ecommerce](#): Collaborative team project created with Postgres, Express, React, Redux, Javascript, Tailwind CSS and Node.js. This app allows users to buy or sell vehicle. I worked in the front doing the section of details, in this section if you are registered you can add/remove/edit your personal post also you can add/remove any item from favorites, leave comments, ask question, contact with the seller and leave any feedback. I made the form in the post section implementing all the validations needed with the backend team to make sure that all the data is working correctly.

- [Pokémon And Videogames APP](#): I made these 2 projects individually where you can find your favorite Pokémons/videogames by fetching data from a public API and storing that data into a database, added some features like a search bar, pagination, filters and a form to create your personal Pokémon/videogame. Technologies: CSS, React, Redux at front. Express, Sequelize, PostgreSQL, AWS RDS for the database.

Grupo ConsulTIC (Remote)(Intern)

Company focused on the support and advice of Comprehensive Solutions in Technology and Communications through business and project management consulting.

- Worked on a project from scratch focused on the legal sector mainly, under a microservices architecture.
- Optimize the web performance.
- Test and debug code.

- Worked with back-end developers and designers.

Freelancer

In my free time, I like to work as a freelancer doing templates or exhibition pages. I made all the designs using Photoshop applying the best UI/UX principles.

- [OmniFood Project](#): My very first website created for client exhibition using UI/UX principles, includes skills of JavaScript with basic HTML & CSS.
- [Post-it project](#): An app made using Nextjs to learn about the benefits of server side rendering(SSR), client side rendering(CSR), Using firebase to store data
- [Twitter Clone](#): This is a personal projector where I used my skills to recreate the popular Twitter application currently X. Using Nextjs as the basis of the project, Tailwind CSS for design and Firebase as a database, adding google authenticator to login and get access to the website features.

EDUCATION

soyHenry

Full stack web developer, 2022 certificate

University Nororiental Gran Mariscal de Ayacucho

software engineer. 2005-2010
