English

Jose Lezama

React Developer

Experienced Frontend developer with over 1 year of experience building responsive, user-friendly, and visually appealing web applications. Skilled in HTML, CSS, JavaScript, NodeJs, PostgreSQL, Sequelize, AWS, Firebase and popular front-end frameworks like React-Redux. Committed to staying up-to-date with the latest technologies and best practices to provide the best user experience for clients.

Experience

Ecommerce

- This is a well made Ecommerce with a team of 5 colleague where you can post, buy or sell any vehicle.
- I worked in the front doing the section where you can see all the details of any post made by any user, in this section if you are registered you can add/remove the article to favorites, leave comments, reviews and push the buy button, if you decide to buy the article you are redirected to fill a form to contact the seller and you will receive an email with all the instructions, also you can see the seller reputation from 0 to 5 stars.
- In collaboration with the team in the back to make sure that all the data is working correctly, i made the form to post your vehicle implementing all the validations needed.
- NodeJs, Javascript, TailwindCSS, React, Redux, PostgreSQL, Express, Sequelize, Auth0, Coudinary, mercado Pago, Railway,

Pokemon and Videogame - App

- I made this 2 proyect individually where you can find your favorite pokemon/videogame by fetching data from a public API storing the data into a database, added some features like a search bar, some filters and a form to create your personal pokemon/videogame
- Technologies: CSS, React, Redux at front. Expres, Sequeleze, PostgreSQL, AWS RDS for the database.

Omnifood Proyect

- This is a full responsive for client exhibition using UI/UX principies, aplaying pure HTML/CSS and queries.
