Profile

I am a motivated software engineer with the ability to challenge others and myself to develop solutions to problems and situations. I have a good understanding of both individual and team goals to collaboratively work towards a common goal. My overall goal as a software engineer is to simplify solutions to technology's complex problems and use the knowledge I already possess to keep improving the quality and ease of work through software. My objective is to obtain a position that will allow me to utilize and apply my experiences to achieve any task or goal that is set ahead of me.
